

# Impact of cosmetic care on quality of life in breast cancer patients during chemotherapy

**Tomoko Shigechi**

*Department of Surgery and Science, Gradual School of Medical Sciences, Kyushu University*

Breast cancer survivors have been increasing in Japan due to development of screening, diagnostic, and therapeutic technology. It is important to manage the appearance-related side effects on breast cancer patients because it can affect their self-esteem and quality of life (QOL). The aim of this study is to assess the impact of cosmetic care on QOL in breast cancer patients during chemotherapy.
